Section 4 CHARACTERISTICS OF SERVICE (20.2(4) d) & (20.2(7))

4.1 Standard

The Cooperative's standard electric service is alternating current, 60 Hertz, single or multi-phase.

4.2 Character

The character of electric service to be made available to each member-consumer shall be dependent upon:

A. The service available at the proposed location.
B. The size of the load.
C. The operating characteristics of the member-consumer's equipment.

4.3 Classes

The following classes of service will ordinarily be offered to the member-consumer: (As applicable for your system)

- 120/240 volt, single-phase, three wire
- 120/240 volt, multi-phase, three wire delta
- 120/240 volt, multi-phase, four wire delta
- 120/240 volt, multi-phase, four wire wye
- 240/480 volt, multi-phase, three wire delta
- 240/480 volt, multi-phase, four wire delta
- 240/480 volt, multi-phase, four wire wye

Other secondary voltages may be made available for special service requirements, at the Cooperative's option.

The above secondary service voltage levels are nominal and may vary within the normal and generally acceptable limits of regulation as set forth in Section 20.7, Iowa Utilities Board Regulations Governing Service Supplied by Electric Utilities.
4.4 Primary Voltage Services
Service at primary voltage may be available for large power and lighting loads at voltages designated by the Cooperative.
